

GUOHAO Filter

focus on high-end filter production

About us

Qinghe Guohao Auto parts Co., Ltd is located in Qinghe County, Hebei Province, an international automotive parts production base. Guohao is a comprehensive enterprise that integrates the research, design, manufacture, sales, after service of automotive filtration systems. We are committed to providing customers with comprehensive solutions for automotive filtration systems.

The company has 30 years of industry experience since its establishment. It covers an area of over 80,000 square meters and has successively passed ISO9001 and TS1694 international quality management system certifications.

Main business

Our company currently has 3,680 models of filters, covering commercial vehicles, passenger vehicles, light trucks, heavy trucks, engineering machinery, agricultural machinery, generator sets, special equipment, etc.

The covered models include mainstream brands around the world.

ANALYSIS OF VARIOUS COMPONENTS OF AIR FILTER

Rubber adopts imported high-end polyurethane
Good elasticity, good sealing,
and high toughness.
Frost protection in winter and
sun protection in summer.

The filter paper adopts super glass
fiber nano filter paper with water-
proof, moisture-proof, and dust-proof
ultrafine fibers. The precise filter
screen adopts a 0.9mm thick filter
screen, which has good rigidity and
long-lasting stability.

The sealing ring is made of high-quality nitrile rubber, with excellent toughness and can withstand various extreme environments. Its sealing performance is long-lasting and stable.

The environmentally-friendly cover
is made of pure nylon material that
is as bright as before, with standard
dimensions and is resistant to
falls, pressure, freezing, and sun
protection.

The water collecting cup is made of high-strength environment-friendly plastic, which is resistant to oil, temperature and aging. Long and stable service life.

The top thread is made of high-quality nylon, which is anti-aging and long-term stable

The filter material is made of imported composite materials, which have excellent environmental filtering effects and exceed industry standards for oil-water separation. The overall filtering effect has reached the advanced level in China.

The shell is made of high-quality cold-rolled steel plate, which is stretched, cut, phosphated, sprayed, and refined through imported high-precision specialized equipment, ensuring the performance and quality of the shell

The threaded cover plate uses thickened material to ensure the tensile strength of the thread modification during use.

The sealing ring adopts high-performance materials, which are resistant to high and low temperatures, and do not age after long-term use, ensuring stable sealing performance.

Environmentally friendly paper filter series

The diesel filter is developed and designed for the specific requirements of the fuel system and high-pressure common rail system, with filtration efficiency and oil-water separation efficiency as indicators, and can provide sufficient protection for the engine under various working conditions.

For passenger vehicles

Oil filter

Cabin air filter

COMPANY PROFILE

The filter workshop is equipped with advanced automated production equipment, including 3 PU filter production lines, 1 metal cap filter production line, 1 injection molding cap machine, and 1 diesel filter production line.

COMPANY PROFILE

4 fully automatic folding and paper loading machines, 2 packaging assembly lines, auto-matic filter welding machine cover clamping equipment, automatic glue injection and other modern equipment.

The intelligent manufacturing process of oil filter

PAPER CORE INTELLIGENT MANUFACTURING - SHELL STAMPING - DRILLING - WELDING - ASSEMBLY - QUALITY INSPECTION
